## Master's

Information Sciences/Systems

I'm planning to specialize in Information Systems, because this field is not common in my country, and Information Systems is a huge factor in the success of any developing country, and I want to obtain a Master's degree in this field so I can develop my country .

My future plan is to return to my country which is developing rapidly and i would like to contribute in this development by engaging my self into a lot of business/social activities.

## EDUCATION

14. LIST EDUCATIONAL INSTITUTIONS ATTENDED IN REVERSE CHRONOLOGICAL ORDER, INCLUDING ANY IN WHICH YOU MAY BE PRESENTLY ENROLLED.

15. LIST SCHOLARSHIPS OR FELLOWSHIPS HELD AT PRESENT OR IN THE PAST *(Give source or sponsor, amount, where held, and duration.)*

16. INDICATE ANY ACADEMIC HONORS OR PRIZES WHICH YOU HAVE RECEIVED, WITH TITLES AND DATES.

17. LIST ANY BOOKS, ARTICLES OR THESES PUBLISHED BY YOU, ESPECIALLY IN YOUR PROPOSED FIELD OF STUDY. *(Give title, place and date of publication.)*

18. LIST PROFESSIONAL SOCIETIES, FRATERNITIES OR OTHER ORGANIZATIONS IN WHICH YOU NOW HOLD MEMBERSHIP OR IN WHICH YOU HAVE BEEN ACTIVE IN THE PAST *(Indicate if you have held an elective office.)*

I'm one of the main founding members of the FOSSIL "Free & Open Source Software In Libya" which is a nonprofit group which consists of Computer engineers whom are volunteers and dedicated in spreading free and open source philosophy and spirit , we have contributed a lot in society and we have gained a lot of popularity and done a lot of exhibitions and courses , I can provide the proper documents.

19. TEACHING EXPERIENCE: *(Include any teaching positions you have held or currently hold.)*

I have been an instructor in giving courses about web essentials(Design,Development &Web publishing, First I gave a course in a company and that was a volunteer work. I gave a course in the department which I studied in and the course was about basic programming using C language and also it was a volunteer work. I worked as an instructor as a part time job in a Company teaching web development.

20. RESEARCH: *(Include any research you have completed or in which you are currently involved.)*

I'm currently engaged in two researches :

- 1- Content management systems , we are currently trying to develop a secure expandable small content management system, which is a web application that manages content out of certain components from the application itself .
- 2- Developing the way students study in the department I use to study in.

**OCCUPATIONAL EXPERIENCE**

21. IDENTIFY YOUR CURRENT POSITION OR OCCUPATION. (Select position title which best describes the activity in which you are currently involved.)

## Detailed description of my objectives

### Study/research

An Information system is a software application that is used to store data records in a computer system and automates some of the information-processing activities on the stored data. Computer-based information systems are in the field of information technology which is what I studied in my bachelor degree in computer science.

Information Systems have a number of different areas of work

- Information systems strategy
- Information systems management
- Information systems development
- Information systems security

And I am planning in studying information system development methods and this study is focused on how the information system is developed and the process if changing data into information.

### Objectives

Obtain professional experience in information systems.

## Reasons for wanting to pursue my objectives

### The first reason

Is the Career, This kind of field is on demand in Libya and you can even establish a company that provides information systems services in Arabic or you can work as an administrator of any IT department that has a huge repository of data. Plus you can teach in any collage that specializes in Information Technology.

### The second reason

I have been using similar systems for the last two years like web based content management systems, and I know how power these applications are and the other reason Is the passion of developing these kinds of systems, I am fascinated by how these systems work and how they can manage huge data and simply providing it as a service to anyone.

### The third reason

I would like to contribute in the development of my country, and we all know that Information Technology is huge factor in this process, Libya is a wide country and the population is spread Through this huge land and this kind of technology can help in providing better services to the Libyan public and making easier for the government and local business to interact with the Libyan public.

Information Systems can help increase services in Libya in all fields' education, health, public service, and this is a huge factor in developing Libya.

Be specific about your major field and your specialized interests within this field. Describe the kind of program you expect to undertake,

### The study that I am applying for will consist of the following

-The design of Information Systems:-

The approaches and methodologies that are used in the process of developing an information system.

I expect to study different types of information systems and how they are integrated and how they were developed, and the different platforms and environments that they work upon, I expect a program that will give me good experience In this field.

And explain how your study plan fits in with your previous training and your future objectives.

I graduated from the computer science department where we studies a lot about information technology and database management systems content management systems which one of the main components of an information system, we developed application that interact with database servers and learned how to manipulate that data and somehow convert it into information, but at the time we were studying undergraduate studies so we didn't get in depth with these kind of systems.

When I was in my last year in the university my graduation project was an ecommerce web application and we designed this web base system that controlled business information of an electronic market and we were happy with the results because we felt the real impact of Information Technology in real life applications.

During the university I was reading a lot about open source software and there were similar applications to information systems, like content management systems, and document management systems, which I know a lot about and have worked with them for the last two years.

## Personal statement

### Objectives achieved:

- Before graduation my goal was to get a job related to what I study, so I can get more professional experience and I have achieved this goal by applying for a job at the Libyan Spider Network.
- My Friends and I successfully established the Free and Open Source Software group in Libya and we have successfully held Linux day in Libya at the 24<sup>th</sup> of January which was successful and a historical event for Libya. It is possible for me to provide documents about this if requested.  
It was a group efforts and the idea started when we were students at the university.
- Developed IT applications and market them, I have succeeded in that by developing a gym registration system, which was created using software development methodologies.

Factors that influenced my professional and educational development since I was a student I was interested a lot in open source software and that gave me access to professional written source code which added a lot to my experience and actually improved my software developing skills.

Two of many things that influenced me in the field that I'm hoping to study are the Open Source Joomla Content Management System and the Knowledge Tree Document Management System.

Commenting about the number of years of practical experience already completed in this field in which academic work will be done in the United States of America. I have done my own research when it comes to Information Systems and related applications as I mentioned before this kind of field is rare in Libya and Libya lacks training centers related to this kind of field, so all of the experience I have gained was through personal research, books, internet and what we have studied back in the university, I have been doing this for the last three years but I hope I can get this chance to study more about this field in the United States of America.

**UNIVERSITY PREFERENCES**

It is not a requirement nor is it expected for you to identify institutions at which you would like to study. However, if you do have preferences, please list in priority order up to three schools of your choice. Indicate specific departments and/or programs. Give specific reasons for each choice. If you have been in contact with professors, please provide names and email and/or phone contacts for each one. Your preferences will be taken into consideration insofar as possible. However, please understand that there is no guarantee that your application will be sent to these programs. Applications are made on your behalf to programs that provide a good 'academic fit' based on your study plans and your competitiveness. The goals and priorities of your scholarship sponsor are also strongly considered.

**46. MOST HIGHLY PREFERRED INSTITUTIONS**

**47. OTHER INSTITUTIONS IN WHICH YOU MAY BE INTERESTED**

Please list any other institutions and departments in which you also may be interested. Again, please understand that there is no guarantee that your application will be sent to these programs.

**48. INSTITUTIONS TO WHICH YOU HAVE APPLIED**

It is not expected that you will have applied for admission to U.S. institutions; however, if you have already submitted an application directly to any universities in the U.S. over the past three years, list the names of these institutions and indicate the response you have received, if any.

**Please mail letters of admission, letters of invitation, and deferral requests to the address located in the Supplemental Forms section.**
